

Building with Nature Resource

Biomimicry is an exciting way to inspire us to look at the natural world and find creative ways to solve problems. 'Bio' means life and 'mimicry' means to imitate or copy. It involves learning from nature to improve the design of places, products, processes and the way we do things.

Find an architect or an engineer who has built something mimicking nature. Write their name and draw their building in the space below.

What is it? What plant or animal is it inspired by?
