

Meeting Nature Resource

Biomimicry is an exciting way to inspire us to look at the natural world and find creative ways to solve problems. 'Bio' means life and 'mimicry' means to imitate or copy. It involves learning from nature to improve the design of places, products, processes and the way we do things.

Find a plant or a habitat (a seashell, a bird's nest, etc) that you like and investigate the science behind it. Write the name and draw the plant or the habitat in the space below.

How does it help us? Has it inspired any inventions?
